Professional Summary

Full Stack Software Engineer with 3.5+ years of experience developing modern web applications, specializing in React-based frontend development with working knowledge of Node.js, REST APIs, and database integration. Experienced in building responsive user interfaces, contributing to backend services, and conducting basic unit and integration testing to improve application stability.

Work Experience

Infosys Ltd. - Pune, India

Technology Analyst | Oct 2025 - Present

- Contributed to a 6-member engineering team migrating a legacy Meteor.js EMS platform to a React-based micro-frontend architecture using Webpack Module Federation, introducing a component-driven UI layer that improved frontend performance and responsiveness by ~40%.
- Enabled cross-framework interoperability by integrating React modules with existing Meteor templates through WebSocket-based communication, ensuring seamless interaction with Java backend services.
- Implemented an incremental migration strategy, modernizing 2 of 8 core modules while allowing legacy Meteor templates and new React components to operate together in production.
- Contributed to CI/CD pipeline improvements, helping reduce frontend deployment time by ~60% and enabling faster and more reliable releases during the migration process

Senior System Engineer | July 2024 - Sep 2025

- Developed and optimized React-based UI components, improving page responsiveness and reducing frontend load time by ~30% through component reusability and efficient state management.
- Built reusable component architecture and integrated REST APIs, reducing development effort for new UI features by ~25% and improving maintainability.
- Performed frontend performance optimization and debugging, improving application stability and reducing UI-related production issues.

System Engineer | April 2023 – June 2024

- Assisted in the development of web applications using JavaScript and React, contributing to backend logic and database interactions with MySQL.
- Implemented UI automation testing using Python and the Robot Framework, increasing regression test coverage by ~40% and significantly reducing manual testing effort.
- Designed and executed comprehensive test plans, test cases, and validation scenarios, improving functional test coverage by ~30**%** across application modules.
- Automated functional and regression test cases for key UI workflows, improving testing efficiency and reducing repetitive testing cycles by ~35**%**.
- Identified, documented, and tracked defects during manual testing using JIRA, improving issue resolution turnaround and collaboration with development teams.

System Engineer Trainee | May 2022 - March 2023

- Completed a 5–6 month training program covering Java, Web Development, and Software Testing fundamentals.
- Learned HTML, CSS, JavaScript, React basics, and database concepts through hands-on projects and internal assignments.
- Assisted the team in basic development tasks and functional testing activities to gain practical experience.
- Supported defect identification and documentation during testing cycles.

Education

- ***Tatyasaheb Kore Institute of Engineering & Technology | October 2021***

  Bachelor of Engineering (B.E)

  CGPA: 6.3/10

- ***Sadhana Jr College of Science, Gadhinglaj | March 2016***

  Higher Secondary Education, Maharashtra

  CGPA: 6.3/10

Project

Hotel Management System | React, JavaScript, Supabase | December 2023

- Developed a comprehensive hotel management website, enabling the owner to efficiently manage orders, customers, room bookings, and catalogs.
- Streamlined processes for placing orders, reserving tables, and booking rooms remotely.

MERN Project | React, JavaScript, Express, MongoDB | July 2023

- A full-stack MERN application implementing CRUD operations for product management using MongoDB, Express, React, and Node.js. Features RESTful APIs and a responsive product card UI with dynamic data fetching.

Skills

- **Languages**: JavaScript, Python, SQL
- **Frontend**: React, HTML, CSS
- **Backend**: Node.js, Express.js
- **Databases**: MongoDB, MySQL, Supabase
- **Tools**: Git, GitHub, CI/CD, AWS, Robot Framework (RIDE), JIRA, VS Code
- **Other Tools**: Microsoft Office Suite (Word, Excel, PowerPoint), Visual Studio
- **Product**: Product Development, Requirement Gathering, System Analysis, Effective Communication, Detailed Observation, Customer Management

Certifications

- The Ultimate React Course 2024
- The Complete JavaScript Course 2024
- Node.js, Express, MongoDB & More
- Introduction to front-end development
